

Free Clinical Trial: Is Your Dog Anxious when Left Alone?

The Behavioral Medicine Service is recruiting for a new Separation Anxiety Study!

Inclusion:

- Greater than 1 year old
- Weighs 2 to 100 kg (about 4.5 to 220 lbs.)
- Anxious (barking, house-soiling, destructive, hypersalivation) when left alone

Study Benefits:

- **Free** physical exam (this can be performed by your local veterinarian)
- **Free** treatment intervention during the study
- **Gift card** at completion (\$150 value)
- **FREE DEVICE** at completion (\$300 value)

The Behavioral Medicine Service is evaluating a non-pharmacologic anti-anxiety device for the improvement of separation anxiety. This study has a placebo group.

To see if you qualify for this study, fill out the following questionnaire:
